No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

# Contents of Volume 89

NUMBER 1, JANUARY 1982

*Notice* ... iii

*Full Papers*

DAVID G. CAPCO AND WILLIAM R. JEFFERY. Transient Localizations of Messenger RNA in *Xenopus laevis* Oocytes ... 1

KATHRYN W. TOSNEY. The Segregation and Early Migration of Cranial Neural Crest Cells in the Avian Embryo ... 13

SZ. VIRÁGH AND C. E. CHALLICE. The Development of the Conduction System in the Mouse Embryo Heart. IV. Differentiation of the Atrioventricular Conduction System 25

JOEL B. SHEFFIELD. Sorting Behavior among Cells from the 14-Day Embryonic Chick Neural Retina ... 41

ANDRÉ F. M. SCHOOTS, RON J. G. OPSTELTEN, AND J. MANUEL DENUCÉ. Hatching in the Pike *Esox lucius* L.: Evidence for a Single Hatching Enzyme and Its Immunocytochemical Localization in Specialized Hatching Gland Cells ... 48

IMRE KOVESDI AND MICHAEL J. SMITH. Sequence Complexity in the Maternal RNA of the Starfish *Pisaster ochraceus* (Brandt) ... 56

BEATRICE HOLTON AND JAMES A. WESTON. Analysis of Glial Cell Differentiation in Peripheral Nervous Tissue. I. S100 Accumulation in Quail Embryo Spinal Ganglion Cultures ... 64

BEATRICE HOLTON AND JAMES A. WESTON. Analysis of Glial Cell Differentiation in Peripheral Nervous Tissue. II. Neurons Promote S100 Synthesis by Purified Glial Precursor Cell Populations ... 72

GIORGIO MANGIAROTTI, PAUL LEFEBVRE, AND HARVEY F. LODISH. Differences in the Stability of Developmentally Regulated mRNAs in Aggregated and Disaggregated *Dictyostelium discoideum* Cells ... 82

STEPHEN J. GAUNT. A 28K-Dalton Cell Surface Autoantigen of Spermatogenesis: Characterization Using a Monoclonal Antibody ... 92

HESTER P. M. PRATT. Preimplantation Mouse Embryos Synthesize Membrane Sterols 101

GLEN K. ANDREWS, RICHARD G. JANZEN, AND TAIKI TAMAOKI. Stability of $\alpha$-Fetoprotein Messenger RNA in Mouse Yolk Sac ... 111

TRUDI SCHÜPBACH. Autosomal Mutations That Interfere with Sex Determination in Somatic Cells of *Drosophila* Have No Direct Effect on the Germline ... 117

CHRISTOPHER P. CARRON AND FRANK J. LONGO. Relation of Cytoplasmic Alkalinization to Microvillar Elongation and Microfilament Formation in the Sea Urchin Egg ... 128

JAMES B. TURPEN AND CYNTHIA M. KNUDSON. Ontogeny of Hematopoietic Cells in *Rana pipiens*: Precursor Cell Migration during Embryogenesis ... 138

WILLIAM J. WASSERMAN, JOEL D. RICHTER, AND L. DENNIS SMITH. Protein Synthesis during Maturation Promoting Factor- and Progesterone-Induced Maturation in *Xenopus* Oocytes ... 152

JOEL D. RICHTER, WILLIAM J. WASSERMAN, AND L. DENNIS SMITH. The Mechanism for Increased Protein Synthesis during *Xenopus* Oocyte Maturation ... 159

H. GLENN HALL AND VICTOR D. VACQUIER. The Apical Lamina of the Sea Urchin Embryo: Major Glycoproteins Associated with the Hyaline Layer ... 168

R. E. KELLER, J. LÖFBERG, AND J. SPIETH. Neural Crest Cell Behavior in White and Dark Embryos of *Ambystoma mexicanum*: Epidermal Inhibition of Pigment Cell Migration in the White Axolotl ... 179

KARL SIROTKIN AND NORMAN DAVIDSON. Developmentally Regulated Transcription from *Drosophila melanogaster* Chromosomal Site 67B ... 196

MARVIN BRUMMEL AND DAVID R. SOLL. The Temporal Regulation of Protein Synthesis during Synchronous Bud or Mycelium Formation in the Dimorphic Yeast *Candida albicans* ... 211

MARK D. BRENNAN, AMY J. WEINER, THOMAS J. GORALSKI, AND ANTHONY P. MAHOWALD. The Follicle Cells Are a Major Site of Vitellogenin Synthesis in *Drosophila melanogaster* ... 225

JOHN SMIT AND NINA AGABIAN. *Caulobacter crescentus* Pili: Analysis of Production during Development ... 237
KENNETH M. NEWROCK, NEIL FREEDMAN, CANDIDO RODRIGUEZ ALFAGEME, AND LEONARD H. COHEN. Isolation of Sea Urchin Embryo Histone $H2A_{\alpha 1}$ and Immunological Identification of Other Stage-Specific H2A Proteins ... 248
JAMES MCGRATH AND NINA HILLMAN. The Effect of Experimentally Induced Triploidy on the Lethal Expression of the $t^{12}$ Mutation in Mouse Embryos ... 254

*Brief Notes*
DAN GOLDOWITZ AND RICHARD J. MULLEN. Nuclear Morphology of Ichthyosis Mutant Mice as a Cell Marker in Chimeric Brain ... 261
JOHN J. EPPIG. The Relationship between Cumulus Cell–Oocyte Coupling, Oocyte Meiotic Maturation, and Cumulus Expansion ... 268
*Feature* ... f1

NUMBER 2, FEBRUARY 1982

*Full Papers*
ROBERT M. GREENBERG AND PAUL N. ADLER. Protein Synthesis and Accumulation in *Drosophila melanogaster* Imaginal Discs: Identification of a Protein with a Nonrandom Spatial Distribution ... 273
LAWRENCE J. WANGH AND WOLFGANG SCHNEIDER. Thyroid Hormones Are Corequisites for Estradiol-17$\beta$ *in Vitro* Induction of *Xenopus* Vitellogenin Synthesis and Secretion 287
LAWRENCE J. WANGH. Glucocorticoids Act Together with Estrogens and Thyroid Hormones in Regulating the Synthesis and Secretion of *Xenopus* Vitellogenin, Serum Albumin, and Fibrinogen ... 294
M. C. BOHN, M. GOLDSTEIN, AND I. B. BLACK. Expression of Phenylethanolamine *N*-Methyltransferase in Rat Sympathetic Ganglia and Extra-adrenal Chromaffin Tissue 299
HERMANN ROHRER AND YVES-ALAIN BARDE. Presence and Disappearance of Nerve Growth Factor Receptors on Sensory Neurons in Culture ... 309
DAVID I. RUBIN AND HANS R. BODE. The Aberrant, a Morphological Mutant of *Hydra attenuata*, Has Altered Inhibition Properties ... 316
DAVID I. RUBIN AND HANS R. BODE. Both the Epithelial Cells and the Nerve Cells Are Involved in the Head Inhibition Properties in *Hydra attenuata* ... 332
J. H. SPRAGG, C. R. BEBBINGTON, AND D. B. ROBERTS. Monoclonal Antibodies Recognizing Cell Surface Antigens in *Drosophila melanogaster* ... 339
GEORGE J. MARKELONIS, TAE HWAN OH, MOHYEE E. ELDEFRAWI, AND LLOYD GUTH. Sciatin: A Myotrophic Protein Increases the Number of Acetylcholine Receptors and Receptor Clusters in Cultured Skeletal Muscle ... 353
LAJOS PIKÓ AND KERRY B. CLEGG. Quantitative Changes in Total RNA, Total Poly(A), and Ribosomes in Early Mouse Embryos ... 362
CAROL J. CHIHARA, DONALD J. SILVERT, AND JAMES W. FRISTROM. The Cuticle Proteins of *Drosophila melanogaster*: Stage Specificity ... 379
SETH S. BLAIR. Interactions between Mesoderm and Ectoderm in Segment Formation in the Embryo of a Glossiphoniid Leech ... 389
STEPHANIE M. CASCIO AND PAUL M. WASSARMAN. Program of Early Development in the Mammal: Post-transcriptional Control of a Class of Proteins Synthesized by Mouse Oocytes and Early Embryos ... 397
FRANK J. LONGO. Integration of Sperm and Egg Plasma Membrane Components at Fertilization ... 409
HOLLY A. THOMPSON AND BRIAN S. SPOONER. Inhibition of Branching Morphogenesis and Alteration of Glycosaminoglycan Biosynthesis in Salivary Glands Treated with $\beta$-D-Xyloside ... 417

MARCIA S. YAROSS, BRUCE A. BACA, MARGARET H. CHOW, AND HANS R. BODE. Commitment of Hydra Interstitial Cells to Nerve Cell Differentiation Occurs by Late S-Phase ... 425

WILLIAM H. KASTERN, MADELEINE SWINDLEHURST, CYNTHIA AARON, JUDITH HOOPER, AND SPENCER J. BERRY. Control of mRNA Translation in Oocytes and Developing Embryos of Giant Moths. I. Function of the 5′ Terminal "Cap" in the Tobacco Hornworm, *Manduca sexta* ... 437

G. TEITELMAN, T. H. JOH, D. PARK, M. BRODSKY, M. NEW, AND D. J. REIS. Expression of the Adrenergic Phenotype in Cultured Fetal Adrenal Medullary Cells: Role of Intrinsic and Extrinsic Factors ... 450

J. CROOP, G. DUBYAK, Y. TOYAMA, A. DLUGOSZ, A. SCARPA, AND H. HOLTZER. Effects of 12-*O*-Tetradecanoyl-phorbol-13-acetate on Myofibril Integrity and $Ca^{2+}$ Content in Developing Myotubes ... 460

ROBERT D. GREY, MICHAEL J. BASTIANI, DENNIS J. WEBB, AND ERIC R. SCHERTEL. An Electrical Block Is Required to Prevent Polyspermy in Eggs Fertilized by Natural Mating of *Xenopus laevis* ... 475

W. MICHAEL O'GUIN AND ROGER H. SAWYER. Avian Scale Development. VIII. Relationships between Morphogenetic and Biosynthetic Differentiation ... 485

SUSAN R. MCALEESE AND ROGER H. SAWYER. Avian Scale Development. IX. Scale Formation by Scaleless (*sc/sc*) Epidermis under the Influence of Normal Scale Dermis 493

*Brief Notes*

MICHAEL W. MCBURNEY AND BRENDA J. ROGERS. Isolation of Male Embryonal Carcinoma Cells and Their Chromosome Replication Patterns ... 503

MARTINE VERDIÈRE, MICHÈLE DERER, AND FRANÇOIS RIEGER. Multiple Molecular Forms of Rat Superior Cervical Ganglion Acetylcholinesterase: Developmental Aspects in Primary Cell Culture and during Postnatal Maturation *in Vivo* ... 509

MAURICE J. ROSENSTRAUS, CYNTHIA L. SUNDELL, AND R. MICHAEL LISKAY. Cell-Cycle Characteristics of Undifferentiated and Differentiating Embryonal Carcinoma Cells 516

ETSUYA MATSUTANI AND YUKIAKI KURODA. Effect of Lectins on Chondrogenesis of Cultured Quail Limb Bud Cells ... 521

JI-HOU XIN, BRUCE P. BRANDHORST, ROY J. BRITTEN, AND ERIC H. DAVIDSON. Cloned Embryo mRNAs Not Detectably Expressed in Adult Sea Urchin Coelomocytes ... 527

A. R. POOLE, A. H. REDDI, AND L. C. ROSENBERG. Persistence of Cartilage Proteoglycan and Link Protein during Matrix-Induced Endochondral Bone Development: An Immunofluorescent Study ... 532

R. M. WARN AND R. MAGRATH. Observations by a Novel Method of Surface Changes during the Syncytial Blastoderm Stage of the *Drosophila* Embryo ... 540

*Auther Index for Volume* 89 ... 549

*Feature* ... *f*1

The Subject Index for Volume 89 will appear in the December 1982 issue as part of a cumulative index for the year 1982.

## Information for Authors

*Developmental Biology* will publish papers on problems of development in the broadest sense. Embryonic and postembryonic development, growth, regeneration and tissue repair in plants and animals, and the analysis of these phenomena at the molecular and cellular levels are topics suitable for the journal. Papers on reproductive biology, aging, and teratology will be published only when they bear on developmental mechanisms of general interest. Papers are sought that employ the techniques and concepts of many disciplines including those of biochemistry, biophysics, cytology, experimental morphogenesis, genetics including cell genetics, immunology, neurobiology, physiology, and microbiology, In all areas, analytical rather than descriptive studies will be favored.

*Original papers* only will be considered. Submission of a manuscript implies the authors' assurance that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Explicit proof of these implied assurances may be required at the Editor's discretion. Articles and any other material published in *Developmental Biology* represent the opinions of the author(s), and should not be construed to reflect the opinions of the editor(s), the publisher, or the Society of Developmental Biology.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

*Articles* usually do not exceed 15,000 words and must be preceded by an abstract of about 200 words that should be fully intelligible by itself. Brief notes are 2500 words or less, including the bibliography, and should have an abstract of less than 100 words. All papers will be published in English.

*Manuscripts* should be concise. Full documentation of results in support of conclusions should be combined with maximum brevity compatible with clarity. The discussion section should relate the present work to previous knowledge but should not be expanded into a review of the field. The standard order of sections is: abstract, introduction, materials and methods, results and discussion. Combined results and discussion may be used. In the manuscript acknowledgment, references, footnotes, tables, and figure legends should follow the discussion in that order. All pages of the manuscript should be numbered consecutively and typed double-spaced throughout. Authors should provide a running title of 35 letters and spaces or less. Use footnotes sparingly. Cite them with superscript numbers and type them on a separate sheet. With rare exceptions do not italicize for emphasis.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

*Abbreviations and units* should be used consistently. Consult the lists published in the *Proceedings of the National Academy of Sciences (U. S. A.)* the *Journal of Biological Chemistry*, and *Biochemistry* for standard abbreviations which need not be defined. Collect all abbreviations into a footnote and refer to it at the first use of an abbreviation. The use of units should follow the Système International. Use prefixes, e.g., $\mu$M, not $10^{-6}$ M. Note that *M* stands for molar, not mole. Use hr, min, sec, rpm, and cpm without definition, without a period, and without an "s" in the plural (i.e., 20 min).

*Figures* should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Mark all figures with the author's name.

*Line drawings* should be made with India ink on smooth white paper or professional-quality drafting paper. Do not submit original line drawings larger in size than 13 $\times$ 10 in.; instead enclose smaller prints. Good quality prints are acceptable in any case. Drawings will be reduced as much as is compatible with the complexity of the figure, usually to column or page width. The lettering should be large enough to be at least 1.5 mm high after reduction.

*Photographs* should be the actual size for reproduction and labeled with letters 2 to 4 mm high. Figures should be planned to fit column (3.5 in., 89 mm) or page width (7.25 in., 184 mm); the depth of each column is 9 inches (228 mm). Sets of micrographs submitted in combinations up to 8 $\times$ 10.5 inches (203 $\times$ 267 mm) in size usually will be reproduced without reduction. For the best reproduction, provide clear, sharp, glossy prints with adequate contrast. The best results will be obtained if authors match the contrast and density of

all figures appearing on a single plate. Figures that are to appear together as one plate should be mounted on cardboard or paper as close together as possible. The printer will place thin white lines between the figures on each plate. Providing an overlay that indicates the most critical areas of the micrograph will aid in ensuring high-quality reproduction. Give magnifications in the legends or indicate them with a scale marker on the photograph.

The second copy of each manuscript must include good-quality glossy prints of all photographs. Two reviewer's copies should be submitted when originals are oversized or mounted on heavy cardboard.

The author will defray the expense of reproducing color figures.

*Tables* should be retyped on separate pages and numbered consecutively with Arabic numerals, and each should have a concise heading.

*References* to the literature should be cited as: Doe (1965) has observed that . . . ; (Doe, 1955); Doe *et al.* (1960) should be used in the case of articles with more than two authors. Use suffixes a, b, etc., following the date to distinguish two or more works by the same authors in the same year (Doe, 1960a,b). Numbered references will no longer be accepted. Arrange literature citations in the bibliography according to the surname of the author, using the following styles:

Hilfer, S. R., and Searls, R. L. (1980). Differentiation of the thyroid in the hypophysectomized chick embryo. *Develop. Biol.* **79,** 107–118.

Markert, C. L., and Papaconstantinou, J., eds. (1975). "The Developmental Biology of Reproduction." Academic Press, New York.

Spiro, R. G. (1972). Study of the carbohydrates of glycoproteins. *In* "Methods in Enzymoloy" (V. Ginsburg, ed.), Vol. 28, Part C, pp. 3–43. Academic Press, New York.

Abbreviate journal titles according to *Chemical Abstracts' Service Source Index.*

*Page proofs* rather than galleys will be sent. This speeds production. Detailed instructions will be sent with proofs. A quick response and minimal changes on proof are imperative to maintain schedules.

*Features* will include announcements of meetings and courses in the field of developmental biology, and some meeting reports. Persons interested in preparing meeting reports are encouraged to contact the Editor.

*To submit* a manuscript, send two copies to Anthony P. Mahowald, Department of Biology, Indiana University, Bloomington, Indiana 47405, Tel (812) 335-6102. Indicate the name, address, and telephone number of the author who should be contacted in editorial matters.
